Software Engineer with 2+ years of experience building scalable backend systems and cloud-native applications. Skilled in Ruby on Rails, React, Node.js, and distributed architectures, with additional experience in machine learning. Proven track record of leading teams and delivering production-grade solutions, including government-scale platforms.

PROFESSIONAL EXPERIENCES

UJET.CX — San Francisco, USA | Remote | Full-time

Software Engineer II (Aug 2025 – Jan 2026)

Software Engineer (May 2024 – Aug 2025)

- Played a key role in resolving critical production issues that pulled the platform out of a Google Code Red state, helping retain two major enterprise clients and safeguarding a multi-million dollar deal.
- Diagnosed and mitigated high-impact production issues across monolithic and microservices architectures on GKE, collaborating with engineering teams in the US, Korea, and Philippines.
- Designed and implemented two new features in a 13+ year-old legacy codebase with event-driven architecture written on Ruby on Rails, serving tens of thousands of users at once, and integrating with multiple microservices while maintaining system stability.
- Improved system reliability through targeted bug fixes, rigorous code reviews, and technical design documentation aligned with Google's SDLC practices.
- Streamlined development workflows using GitLab Flow and trunk-based development, and built CI pipelines with GitHub Actions.

ITD Security — Dubai, UAE | On-site | Full-time

Full-stack Developer (Aug 2023 – Jan 2024)

- Developed features for the Donzon ad platform using Laravel.
- Managed multiple websites and email servers of the sister companies in GoDaddy.

National River Conservation Commission — Dhaka, BD | Contractual

Software Engineering Lead (Apr 2023 – Dec 2023)

- Led a 5-member team to design and deliver a government platform enabling citizens to report river-related issues directly to authorities.
- Architected and developed the backend system powering a multi-application ecosystem, including a public reporting app, an investigator app, and an administrative dashboard using React Native and Next.js.
- Deployed and managed the system on AWS (EC2, MySQL), ensuring reliability and scalability for real-world government operations.
- Acted as the primary technical liaison for stakeholders, conducting client meetings, gathering requirements, and driving end-to-end project delivery.

CleInsight — Singapore | Remote | Internship

Software Developer Intern (Nov 2021 – Feb 2022)

- Built web applications using Vue.js and Angular on AWS.
- Collaborated with remote teams in a Scrum-driven development process.

TECHNICAL SKILLS

Languages: Ruby, Python, JavaScript, TypeScript

Frameworks: React, React Native, Angular, Ruby on Rails, Django, Node.js, Next.js

Databases: MySQL, PostgreSQL, MongoDB

DevOps: Docker, Kubernetes, AWS, GCP, GitHub Actions

EDUCATION

United International University

Bachelor of Science in Computer Science and Engineering (Jan 2019 - Jan 2023)

- CGPA: 3.85 (out of 4.00)
- Major: Data Science.
- Thesis: Improvement of Scene Understanding using Scene Graphs.
- Courses: Software Engineering, Software Architecture, Artificial Intelligence, Machine Learning, Digital Image Processing.

Feni Computer Institute

Diploma in Engineering (Aug 2014 - Jul 2018)

- Associate diploma in Data Telecommunications and Networking Technology.

ADDITIONAL EXPERIENCES

United International University — Dhaka, BD | On-site | Seasonal

Undergraduate Teaching Assistant (Aug 2022 - Jan 2023)

- Assisted with undergraduate coursework and lab sessions, graded assignments, and maintained academic records.

Upwork

Freelance Programmer (2020-2021)

- Wrote web scraping and automation scripts using Python-BeautifulSoup.
- Created web applications using React and Python-Flask.
